DETAILED ACTION

1. This case is a 371 of PCT/JP04/02559 filed 03/02/2004.

Priority

2. Receipt is acknowledged of papers submitted under 35 U.S.C. 119(a)-(d), which papers have been placed of record in the file.

Claim Rejections - 35 USC § 102

3. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

4. Claims 1, 4, and 7 are rejected under 35 U.S.C. 102(b) as being anticipated by Kurahashi, US Patent No. 5,657,081.

Kurahashi discloses an electronic apparatus having a main body and loadable storage unit comprising: a holder 24 which holds said recording medium having said connection terminals and which is moved between an insertion/take-out position where said recording medium inserted or taken out and a completion position where the loading of said recording medium is completed; a chassis for supporting said holder movably said insertion/take-out position and said completion position; terminal electrodes 23 which are mounted to said holder and to which said recording medium are connected; and a lock lever 28 for locking said holder in said insertion/take-out position, wherein the locking of said holder in said insertion/take-out position by said lock lever is which are mounted to said connection terminals of said is released when

Art Unit: 2876

said connection terminals said recording medium are connected to said terminal electrodes (see figs. 13-18; col. 6, line 40+).

Re claim 4, wherein said holder 24 is integrally provided with holding portion for holding said recording medium inserted in said holder (see fig. 14).

Allowable Subject Matter

5. Claims 2, 3, 5, and 6 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

6. The following is a statement of reasons for the indication of allowable subject matter: Although the prior art of record teaches a loadable device which includes a holder for holding recording media, chassis for supporting the holder, terminal electrodes for connecting to the recording media, etc., the prior art of record fails to disclose or fairly suggests all the details including, the restriction of the chassis, the detail of the transmission gear/conveying rack, how the holder is formed, etc. These limitations in conjunction with other limitations in the claims were not shown by, would not have been obvious over, nor would have been fairly suggested by the prior art of record.

Conclusion

7. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Tomatsu, US Patent No. 6,691,920.
